- Manual
- Battery electric

QUALITY RESULTS

TROLLEYS

Cotton On

A fleet of STURGO® Nestable Roll Cage Trolleys helped to streamline the order picking and packing process. To improve handling and ergonomics, custom folding handles were manufactured and fitted.

Arnotts

The STURGO® Double Roll Cage Trolley was modified to provide a mobile workstation. The castors were upgraded, three shelves were supplied, the overall trolley depth was decreased, and a tool shadow board was fitted to the rear wall of the trolley, with reinforced full-height bracing.

Wildflower

Custom-built trolleys for handling of linen and laundry items, with linen covers for content protection. Specifically designed to fit into their transport vehicles, with custom attachments installed in the vehicles to streamline the process.

Shell

Custom-built trailer carts for the oil and gas industry. Features include zinc coated steel construction, removable mesh sides for easy loading and unloading, and flat free wheels to suit rough terrain and minimise maintenance costs.

BHP

Custom coloured STURGO® Spring Base Mesh Trolley.
