Prevent injury
Minimise impact

Preventing new incidents or re-injury requires strong foundations and systematic processes

Manage risk before and after injuries

Identify, assess, control and review hazards

Investigate hazards, incidents and injuries

Register incidents and risks

Early report, response and medical intervention

Communication between employer, worker and health provider

Educate all about the benefits of early return to work

Involve all parties in Return to Work (RTW) programs

MANAGE RISK

MANAGE INJURY

CULTURE

LEADERSHIP

Integrate safety and health into business at all levels

Plan your response to injuries (IMS)

Build a genuine culture that supports and promotes OSH

Stamp out complacency - she'll be right is not alright

Plan safety at proactive and reactive levels

Lead at all levels

Educate and inspire

Consult, listen and act

Be systematic and methodical

Innovate through safe design

Coordinate and nurture initiatives

Support workers injured at work
