

# FLAMMABLE LIQUIDS CABINET

As the safety signage and directions suggest, this Australian-made storage unit meets the highest standards when it comes to keeping your flammable liquids safe and secure.

- **Heavy-duty.** Double walled thermal barrier. For added protection additional undercoat etch is used before high gloss powder coat finish.
- **Movable.** Underside base skids for ease of moving full or empty by pallet trolley.
- **Safe.** Alloy contact points – no spark risk. Underside safety strapping to prevent cabinet tipping over.
- **Self-closing.** Automated / self-closing and self locking mechanisms.
- **Adjustable.** Shelf height.
- **Secure.** Key lock door handles and three point latch locking
