'Beak Grab'

Usage

Drum Lifting mechanisms suitable for attaching to a forklift, enabling fast and efficient transport of heavy drums.

Specifications

Model 11640003 - Single Drum Lifter

Working Load Limit: 1000kg

Unit Weight: 72kg

Fork Pocket Size: 185 x 60mm

Load Centre: 1210mm

Finish: Zinc plated

Description: This product is suitable for the lifting of one 205L steel or plastic drum. It provides a good field of vision for the forklift operator throughout the manoeuvre. The unique beak designed clamp provides high clamp force even when travelling on uneven ground. The contoured drum rest is low enough down that it doesn't impact or damage the drum or it's labelling.

Model 11640004 - Double Drum Lifter

Working Load Limit: 1500kg

Unit Weight: 95kg

Load Centre: 1250mm

Fork Pocket Size: 185 x 60mm

Finish: Zinc plated

Description: This product is suitable for the safe lifting of 2 x 205L steel or plastic drums side-by-side. It provides a good field of vision for the forklift operator throughout the manoeuvre. The unique beak designed clamp provides high clamp force even when travelling on uneven ground. The contoured drum rest is low enough down that it doesn't impact or damage the drum or it's labelling.

Drum Lifter Forklift Attachments

Specifications

Model 16810010 - Drum Lifter 1000kg

Working Load Limit: 1000kg

Unit Weight: 60kg

Fork Pocket Size: 185 x 60mm

Load Centre: 1160mm nominal

Description: This unit ensures 205L steel drums are moved with 100% security. The drum is quickly clamped into the support via the dual chain belly strap. A further safety catch prevents accidental release.

Model 16810011 - Drum Lifter with Plastic Barrel Option

Working Load Limit: 350kg

Fork Pocket Size: 185 x 60mm

Load Centre: 1160mm nominal

Description: This unit is an alternative to Model 16810010 which can accommodate the handling of plastic drums.

Model 16810015 - Drum Lifter 500kg

Working Load Limit: 500kg

Fork Pocket Size: 190 x 90mm

Unit Weight: 65kg

Finish: Zinc

Description: This unit is an alternative to Model 16810010 which can accommodate the handling of plastic drums.
