

# Drum Management System

## Usage

This modular system combines efficient drum storage, positive spill control and safe liquid dispensing.

## Features & Benefits

- Design permits use of 60L and 205L drums (large drums should always go underneath smaller drums when using a combination of both sizes)
- Base module with moulded-in drum lock channels holds drums in position and supports loads up to a total of 1350kg (675kg on base unit and 675kg on stacker unit) and has a 250L sump capacity
- Fully compliant with EPA regulations
- Forklift pockets for easy transportation
- Made from UV protected polyethylene construction - compatible with most chemicals

## Specifications

### Model 13360009 - Base Unit

Dimensions: 1245mmW x 1499mmD x 660mmH

Load Capacity: 1350kg

Sump Capacity: 250L

### Model 13360010 - Stacker Unit

Dimensions: 1245mmW x 1168mmD x 305mmH

Load Capacity: 675kg

### Model 13360129 - Safety Strap

Load Capacity: 1800kg

### Model 13360113 - Dispensing Shelf

Load Capacity: 25kg

Mounts securely to the Stack Module
