13360039

13360041

13360094

13360001

## Usage

These showers and eye/face wash units are simple to install, access and use. These units are an effective and fast method of getting workers out of dangerous and/or fatal situations.

## Features & Benefits

- All Shower units feature non-clogging and self cleaning heads
- Impeller action heads allow even distribution of water flooding to ensure faster complete body coverage
- Eye wash units provide soft dual streams of aerated water to instantly wash away contaminants
- Eye and Face washers are designed to provide fast cleansing, low velocity curtains of aerated water for gentle cleansing
- All units have been independently lab tested to Australian Standards

- Aerated water provides a peroxide scrubbing action to remove contaminants from delicate membranes efficiently
- Enquire about laboratory-specific eye/face wash units and non-aerated water units

## Specifications

### Model 13360001 - Decontamination Shower

Multi-spray shower with 2 x stainless steel wall panels, eye/face wash, 16 spray heads (volume adjustable). Operated by standing on the shower platform.

### Model 13360033 - Eye/ Face Wash Pedestal
