

Safety Step Ladders

Usage

These ladders feature extra wide and deep- treads for better user stability and safety.

Features & Benefits

- Engineered with lightweight yet sturdy aluminum construction
- Extra large steps (225mm x 300mm) with skid resistant rubber tread provide better stability
- Large corrugated plastic foot pads help to protect flooring
- Fold flat when not in use – easy to store and transport
- No sharp edges or corners
- Some models feature a safety bracket/ handrail which provides tool storage

Specifications
