

Spill Containment Caddy

Usage

A single solution for drum handling safety, mobile dispensing capability, and in-built containment

Features & Benefits

- Simple solution for drum handling safety, mobile dispensing and built-in spill containment!
- Polyethylene construction provides resistance against corrosion and deterioration, assuring a long lifetime
- Large 250mm Pneumatic tyres assist with outdoor movement over rough terrain
- Move up to 275kg safely and easily, with minimal risk of back strain injuries
- Large rounded handles accommodate heavy work gloves

- One piece double walled construction provides added strength and eliminates leaks
- Can be used with 60L or 205L drums
- Ergonomically designed to ensure weight is not absorbed by the spinal column during tipping action.
