

WERKS®

Perforated Panels

Usage

WERKS® Panel Systems are used for storing, organising and maintaining the safety of your warehouse, workshop or yard; they also assist in keeping track of your equipment as you can easily identify if items are missing or damaged. Reduce time spent looking for tools or equipment in a disorganised mess – Backsafe Australia can help you design the best panel system to suit your workplace and improve efficiency.

Features & Benefits

- Steel panel 1.2mm thick, chamfered all round, strengthened with specially shaped bearers
- Perforation size: 10mm x 10mm
- Concealed screw holes
- Suitable for wall mounting (vertically or horizontally)
- Can be used in many different ways, from wall-mounted storage panels to partition walls, trolleys, and tool cabinets
- Shadow labels can be applied to panel systems for simplified storage
